CHRYSANTHEMUMS.

A PERFECT SPECIMEN OF AN INCURVED
CHRYSANTHEMUM FOR EXHIBITION.

NEVER were Chrysanthemums more generally grown, and to such perfection, as now. Shows are springing up in nearly every town; and, to meet the demand for plants and cuttings, we devoted quite two acres to their production, and, in fact, several houses are allotted to their special culture; and, as near as they can be counted, not less than 12,000 plants are in 4-in. pots for immediate sale. There can be no

H. Cannell & Sons' Floral Guide.

doubt about their being correctly named—we have five houses (100 feet each) specially for them to develop their blooms. At the proper season we have a display consisting of all the best and most distinct kinds, which forms unquestionably the finest and most complete collection of this family ever brought together, and will, of course, include, like all our collections of florist flowers, the original species to the latest new and improved kinds. For comparison, throughout November, this will be found an opportunity such as has never before been offered to lovers of this genus.

We long promised to introduce a new way of putting up cut blooms of Chrysanthemums for Exhibition, but, of course, said all, such a way would never look well, but admitted that it would be worth trying, and also said he would be a bold fellow who dared to venture in public with a departure from the ordinary and original style. We determined, therefore, to present six boxes, 4½ feet long, 18 inches wide, as per engraving above, before the Floral Committee at the Royal Horticultural Society, and to our delight and surprise before we had completed staging the flowers, all our Floricultural critics spoke aloud that our new system was the right and proper one, and there and then unanimously resolved that we should be presented with the Gold Medal—but we never got it probably from the scarcity of material to make it.

Shirley Hibberd, Esq., *Gardeners' Magazine*, speaks thus:—"At the meeting of the Floral Committee, Messrs. Cannell & Sons showed a lot of cut flowers of all the sections mounted on green moss in the manner of roses. About nine-tenths of the cultivators of these flowers would find it impossible to follow the excellent example, but the practical lesson has its value, for if green moss is not everywhere obtainable there may be some suitable substitutes in the world that town amateurs could secure for the purpose. For the present we must jog trot with our green boards, and keep the green moss in mind as a pleasant thing to dream about."

Exhibition blooms cannot be supplied.

H. Cannell & Sons' Floral Guide.

At the great National Show at the Royal Aquarium, where we had exhibits extending 40 ft. in length, representing all the sections of Chrysanthemums, the entire public was in favour of the system, the mechanical formal green flat boards of the neighbouring exhibit being frequently contrasted with ours. We all know that large glaring flowers without green lose half their charm, whereas by this system a natural green can be added and their own lovely foliage can be shown as well, which gives the whole an exquisite appearance, and all societies must eventually offer prizes for the best blooms set up in a rose box in this manner: a box 4 ft. 6 in. long, back 6 in. high, front 4 in. high, made to exhibit twenty-four roses, will stage either of the following—twelve incurved (three to four blooms to the bunch), twelve recurved (ditto), twelve varieties of Japanese (ditto), twelve large Anemones (ditto), eighteen Pompons or eighteen Pompon Anemones (ditto). Cut the flowers, and wire each separately, so that the blooms can be faced in any direction, bunching three together with a bit of moss between; so that they are a nice distance from bloom to bloom, and arranged to height, colour, and size. It will be necessary to have zinc tubes $1\frac{1}{2}$ inches in diameter, and about 4 inches long, with a flat foot stand to keep them erect, and place them in accordance with the height of the box, so that when all is done they show one continuous face, every flower in its proper position; one half-inch cut too high or too low will destroy its artistic arrangement. When carried out well, such an exhibit will be the pride of the show. A thick circular piece of cardboard should be placed at the back of the flowers of the Japanese, large Anemones, and incurved flowers to hold up their petals; that is, cut a round the size required, and make a hole in the centre of the card for the stem, cut to the outside, and pin in the shape of a lamp shade, with a bit of raffia round the stem, which will hold it up in its place; this, together with some nice stub moss for the surface of box, is all that is necessary; the other few details can be seen to as it is being proceeded with.

For the best treatise, "How to grow the Chrysanthomums to perfection," see Molyneux's Book, sent post free, 1s. 2d.

Our stock is such as to enable us to supply well-established plants of the whole of the varieties in November, they will then all be in flower, and for immediate decoration, propagation, and correctness of name, leave nothing to be desired.

CHRYSANTHEMUM CUTTINGS.

We have adopted quite a new course with our stock for the supply of cuttings, which we believe will be much more satisfactory to the purchasers, and far more successful than those supplied in the usual way from plants which have stood close together with their long drawn-up cuttings, and often from those not very healthy, whose colours have been strained to the utmost.

We now plant out our stock of young plants first week in May in the open ground, and cut them down the end of September, then lift them with large balls of earth and plant them in our earth-stage, close against the glass. They soon begin to throw up quantities of cuttings of a short sturdy nature, quite different to those from exhibition plants, and the difference is such that all growers who have seen our two houses, 100 ft. each, full of these roots, would decide never to grow from the over-worked old stools again.

NEW VARIETIES FOR 1891 (CANNELL).

NEW INCURVED CHRYSANTHEMUM.

TWO FIRST-CLASS CERTIFICATES.

ROBERT CANNELL.—Having grown and flowered 30 large plants this year (1890) we are able to describe it correctly. Like all our seedlings, it has the *Avananche* habit, dwarf, about 3 to 4 feet high, strong, free growth, every bloom coming good, and all beautifully incurved. So large are the flowers that it can be used either as an ordinary incurved or Japanese incurved; colour bronzed, with under petals distinctly gold coloured, every petal broad and bold. We staged a box of 50 blooms at the Centenary Show, which was the most conspicuous object in the exhibition. Price 4s. each (after March, 2s. 6d.); cuttings, 2s. 6d., sent post free. Ready for distribution in February. Awarded First-Class Certificate, National Chrysanthemum Society; First-Class Certificate, Manchester.

THE GARDEN.

ROBERT CANNELL—A beautiful seedling incurved variety, raised by H. Cannell & Sons, and showing a marked advance. It is of the true incurved character, one of the flowers measuring 5½ inches in width, the shape and finish faultless, and the colour a rich chestnut-red, the upper surface of the florets deep bronzy gold. We shall expect to see this even finer, as it has the making of a matchless incurved flower.

On visiting **H. CANNELL & SONS' Nursery, THE GARDENERS' MAGAZINE**, November 8th, says:—

Conspicuous amongst the numerous novelties that have a place in the collection is the new incurved variety, *Robert Cannell*, which created so much interest when submitted to the Floral Committee of the National Chrysanthemum Society last year. Anticipating a brisk inquiry for so important an addition to its class, the firm have grown the variety largely, and the scores of finely developed blooms afford the best possible opportunity for estimating its value for exhibition. The growth, it may be interesting to state, is robust and comparatively dwarf, and the flowers are of the largest size, with broad finely incurved smooth florets, and perfectly distinct in colour, the inner side of the florets being red-crimson and the back orange-buff. Such a distinct novelty should speedily take a prominent position amongst back row flowers.

W. H. FOWLER, Esq., Claremont, Taunton, November 29th, 1890.

Book me for six *Robert Cannell* and ten *Louis Bochmer*, and I hope to have a go at your prize.

Mr. P. BLAIR, Trentham Gardens, Stoke-on-Trent, December 1st, 1890.

Please send me six each Chrysanthemums *Robert Cannell* and *Louis Bochmer*. I shall be after both prizes you are offering.

THE GARDEN, 6th December, says:—A new Chrysanthemum, *Sunset*. This will inaugurate a new race, and it gives indication of a distinct departure. It has a bold outline, and is utterly unlike any other.

NEW YELLOW FLOWERING ANEMONE.

Sent out and highly recommended by H. CANNELL & SONS.

GEO. HAWKINS—A sport from *George Sands*. In this section no variety is better known and appreciated than the parent, coming so regularly under all modes of cultural treatment. The sport offered is in every way similar in shape and habit: colour a bright, clear, and attractive golden-yellow of the richest hue. It has been tested and proved true for years, and is a really attractive plant. 3s. each.

MRS. BEATRICE CARD (NEW SHAPE JAP.).

MRS. BEATRICE CARD (Card)—A lovely, neat, pretty, new dwarf growing Japanese variety, of which the engraving is a correct representation. Although not large enough for exhibition, yet for its beautiful shape and brilliant scarlet-chestnut colour (even higher than *Cullingfordii*) it is a gem; an English-raised seedling. 4s. each.

ARTHUR WOOD (Cannell)—Colour reddish brown, tipped yellow, high centre. Received Award of Merit, Royal Horticultural Society. 5s.; after 1st March, 4s.

H. Cannell & Sons' Floral Guide.

NEW CHRYSANTHEMUMS, 1891.

R. C. KINGSTON—Raised by Mr. Surman, Germantown, Philadelphia. For dark purple pure colour we have nothing near it, and can be distinctly seen from one end of a 100-ft. house to the other; of large size, very free, and a capital grower and bloomer. Messrs. Shea, Mitchell, and Molyneux are growing it, and expect next year another *Etoile de Lyon*. It certainly should be in every exhibit of Japanese varieties. Price 4s. each; cuttings, 2s. First-Class Certificate, Royal Horticultural Society.

W. TRICKER—An American variety, named after the most successful grower and prize-winning amateur in the United States, and is the most lovely incurved Japanese kind yet seen; colour sweet delicate rose, every flower incurving in a most attractive form. Award of Merit, Royal Horticultural Show. 3s. 6d.

WM. KENNEDY—A hybrid Pompon of a beautiful rich crimson-shaded amaranth. 2s. 6d.

ENGLISH SEEDLINGS.

ACHIEVEMENT (Jap.)—Seedling from *Mdme. Desgranges*; white, primrose centre, long broad petals, superior to its parent: a really first class variety. October flowering plants. 2s. 6d.

AUTUMN QUEEN (Jap.)—A seedling from *Arulanche* and *M. Marroch*; long broad drooping petals, rich yellow, slightly tinted rose, fine habit; a splendid acquisition. 3s. 6d.

BEAUTY OF CASTLE HILL (Jap. Inc.)—One of the largest Japanese ever raised; colour rich golden yellow, reverse of petals lined bright salmon-rose, very long broad florets, incurving; fine vigorous habit and constitution, retaining its foliage to the last; a grand exhibition variety. Plants, 5s. First-Class Certificate.

CHARLEY MASKELL (Jap.)—Rich ochre-yellow, novel colour, very full; fine form, slightly frimbriated; a fine show flower. Plants, 3s. 6d.

CORAL QUEEN (Jap.)—Coral red, shaded salmon, petals twisted and pointed; fine decorative variety; will become a favourite for cutting. October. 3s. 6d.

DUCHESS OF WESTMINSTER (Jap. Anem.)—Long drooping guard petals, silver blush centre, rosy bronze: very full. First-Class Certificate. 3s. 6d.

LADY EMILY FITZMAURICE (Ref.)—Seedling from *Mdme. Desgranges*; distinct shade of yellow; very free flowering decorative variety; dwarf habit. Plants, 2s. 6d.

MR. W. LANF (Jap.)—Bright cinnamon, shaded rose, broad florets, very full flower; fine exhibition variety. First-Class Certificate. 3s. 6d.

MRS. G. HERRING (Jap.)—Light pink, reverse silver-white, long broad strap-shaped petals, large flower; very fine; a great acquisition. Plants, 3s. 6d.

MRS. G. C. SCHWABE (Jap.)—Delicate rose, shaded salmon, points of petals gold, twisted, and drooping gracefully; flowers most durable known; fine for exhibition or decoration; dwarf habit: a very distinct and pretty variety. First-Class Certificate. Plants, 3s. 6d.

MR. G. HERRING (Jap.)—Crimson-carmine, long drooping florets, twisted and pointed; very fine show variety; good dwarf habit; highly commended. Plants, 3s. 6d.

MR. M. SULLIVAN (Ref.)—Seedling from *Putney George*; rosy mauve, tipped white, large broad recurving petals, same form, size, and habit as its parent. Plants, 3s. 6d.

GLOIRE DU ROCHER—A distinct flower of the largest size, bright orange-amber, flushed crimson; in habit it somewhat resembles *Mrs. F. Jameson* and *L'ad d'Andoré*. 5s.

FLORENCE DAVIS (Davis)—Greenish white, passing to pure white; long, drooping, and slightly twisted florets; splendid habit; fine exhibition flower. 5s.

KATE MURSELL—A beautiful primrose; sport from *Lady Lawrence*. 5s.

MRS. MARIAN THROWER—White ground, flushed and striped rosy lilac; an enormous flower; long stiff florets; a back row flower. 3s. 6d.

GRAND NEW PLUMED PINK CHRYSANTHEMUM.

LOUIS BOEHMER—Sent out by Messrs. P. Hendersen & Co., of New York, who have appointed us Sole Agents for the distribution in Europe of this splendid variety, which created such a sensation at all the American Autumn Shows last year. It partakes even more of the hirsute appearance in its flowers than *Mrs. A. Hardy*, but it is a much stronger grower, and one of the greatest acquisitions in Chrysanthemums ever introduced, and sure to be in great demand the moment it is seen. Awarded First-Class Certificate at Manchester.

4s. each; special prices to the trade.

GARDENERS' MAGAZINE, November 29th, 1890.

Messrs. Cannell & Sons, of Swanley, have forwarded a bloom of the latest Japanese hairy novelty, *Louis Boehmer*, which they say has been sent to them all the way from America. At the time of writing these lines it has been on my desk exactly a week, and the following is a description of the bloom: It is a full, deep, solid flower, measuring over five inches in diameter; the florets of the exterior are four inches in length and three-eighths of an inch in breadth. They are regularly incurving towards the centre, and deeply grooved, not rounded at the tips, but very pointed. The inner sides of the florets are smooth, and of a deep purplish amaranth, similar to *Madame de Sévigné* in colour; the reverse veined, like most of the incurving Japanese; is of a pink wax-like shade, and plentifully covered towards the tips with those peculiar short hairy growths that render this and its companion, *Mrs. Alpheus Hardy*, so remarkable in the eyes of those who are always on the look out for novelties. The bloom now before me is about half as large again as the illustration of it in the *GARDENERS' MAGAZINE*, November 8th.

LOUIS BOEHMER.

H. Cannell & Sons' Floral Guide.

THE GARDEN, November 22nd, 1890.

CHRYSANTHEMUM LOUIS BOEHMER.—Messrs. Cannell & Sons, of Swanley, have forwarded a bloom of this new variety, which they state has been sent to them from America. Compared with the one exhibited at the centenary show of the National Chrysanthemum Society last week, it is much deeper in colour and larger. The Swanley bloom is a full, deep, solid flower, measuring over 5 inches in diameter without stretching out the florets to their full extent, the outer ones being 4 inches from base to tip. The florets are fully three-eighths of an inch broad, very regularly incurving towards the centre, the inside of them being of a deep purplish-rose, with the reverse several shades lighter. The hair-like growths are numerous; they appear on the back of the florets and mostly towards the extremities. The inner florets are the more noticeable in this respect. As mentioned in *THE GARDEN*, November 15, 1890 (p. 452), the stem is strong and stiff.

GARDENING WORLD, November 22nd, 1890.

CHRYSANTHEMUM LOUIS BOEHMER.—A fine bloom of this new pink "plume" variety sent from America has been forwarded to us by Messrs. H. Cannell & Sons, and which even after its long journey was quite fresh, with the exception of a few of the outer florets. The bloom measured 5 ins. in diameter, and is precisely of the same form and habit as that of *Mrs. Alpheus Hardy*. The upper surface of the florets is of a bright rosy purple, but the reverse is of a clear soft pink, so that the variety may rightly be described as a pink *Mrs. Alpheus Hardy*, owing to the incurved state of the florets. The bristly hairs on the back of the latter are slightly branched, and confined chiefly to a portion near the apex of the reverse surface. In any case the centre is more or less hidden by the incurving florets. It is therefore not only quite distinct from *Mrs. Alpheus Hardy*, but very pretty, and a great acquisition to a race which may yet become numerous.

Mr. R. W. SANDERS, Editor of "Amateur Gardening," November 15th, 1890.

Many thanks for the bloom you have been good enough to send me to-day of *Louis Boehmer*. I had heard a great deal of this wonderful variety, but not had the pleasure of seeing one of the blooms until I received yours. I am exceedingly pleased with it, and should imagine it will ultimately become a very popular variety. At any rate, the bloom you send affords every promise of such being the case. Personally I prefer *Louis Boehmer* to *Mrs. Alpheus Hardy*, and I shall be very much surprised if it does not far outstrip the latter in popularity. How wonderfully fresh the bloom looked after its long transatlantic journey; it is marvellous that such a feat should be accomplished so successfully. A coloured plate will appear in this paper the first week in February.

C. HARMAN PAYNE, Esq., 60, Thorne Road, South Lambeth, S.W., November 15th, 1890.

I have received the bloom of *Louis Boehmer*, and from what I had previously heard of it from America was not prepossessed in its favour. But the flower you send of the new hairy petalled Japanese is something out of the ordinary, and is, I consider, a greater curiosity than *Mrs. Alpheus Hardy*. It is a bold incurving Japanese, with long grooved petals, about five inches in diameter, and four inches in depth. But for the regular incurved form of the petals the flower would be at least twice the size across, for I measured a single petal and found it just over four inches in length. Inside, the colour is a deep purple amaranth, and the reverse is a soft silvery pink. The hairs are very numerous and clearly defined, being mostly towards the tips of the petals and on the reverse. To judge by the stem it seems that *Louis Boehmer* is a sturdier growing plant than *Mrs. Alpheus Hardy*, and it has, I notice, a similar wax-like appearance on the outside of the petals.

WEEDON BEAUTY (Pearce)—The well-known *Baronne de Prailly* sported *Carew Underwood*, and now the latter has sported and given us this lovely red chestnut and gold offspring, retaining the grand shaped flower of its grandparent, which is highly prized and always shown in nearly all first and second prize stands; this is a good one indeed. 4s. each.

SUNSET—The most extraordinary single variety ever seen. When shown before the Floral Committee, and awarded a first-class certificate, the theme of conversation was that no one without measuring its wonderful proportions would believe from tip to tip it measured 16 inches and an unusual breadth of petal, and 9 inches from outside shoulder to shoulder; ground colour lovely orange-yellow with half of most of the petals bright red-tinted rose, which makes it most striking and attractive in the extreme, where a grand and uncommon floral object is desired, and which one can hardly believe is real without a minute examination; this is the kind for dinner table decoration. It is the most astonishing Chrysanthemum ever produced; has the pleasant fragrance of the daffodil. 3s. each.

CANNELL'S SUNFLOWER.

SWANLEY YELLOW, *syn.* **SUNFLOWER (Cannell)**—A seedling raised and sent out by us. It was certificated in 1888 wherever shown; so distinct and beautiful is its whole character that it is universally spoken of as the best Japanese of the year, and a standard variety; habit, growth, and freeness of bloom, all that can be desired, and is the gem of the year. The accompanying engraving hardly does justice to this lovely kind. Two First-Class Certificates. 1s. 6d. each.

THE GARDEN, October 13th, 1888.

* **SWANLEY YELLOW**, the Japanese Chrysanthemum recently certificated by the National Chrysanthemum Society, promises well. It is a flower of massive character, broad, solid, and of a brilliant yellow colour. See engraving, page 5.

ETOILE DE LYON.—Largest flower in cultivation. A grand variety; very large, deep lilac rose shaded silver. See large engraving showing this wonderful and best variety of the year. First-Class Certificate wherever shown. 1s.

MRS. FALCONER JAMESON (Cannell)—Enormous blooms of a chestnut bronze, tinted and striped with yellow, high centre and large; habit the best of its class. First-Class Certificate. 1s. 6d.

JOURNAL OF HORTICULTURE, 171, Fleet Street, London, E.C.

Mrs. F. Jameson is a clipper. First-Class Certificate at Southampton yesterday, and only lost by a shaving the prize for the best flower in the show, this falling to *E. Molyneux's Avalanche* (Cannell); splendid and certificated also.

NEW JAPANESE CHRYSANTHEMUMS.

The following new Japanese Chrysanthemums are the cream of the many hundreds which are being sent out every year. Those certificated, and several of the others, will certainly become exhibition varieties of the highest excellence, and all should be grown by exhibitors.

MRS. ALPHEUS HARDY—When well grown is one of the most distinct pure white varieties in cultivation. Unfortunately it has a weak constitution, its roots are very feeble and tender, and must be grown in light, peaty, cocoa-nut fibre soil, potted loosely until established, and then more firmly potted. When the secret of its requirements are ascertained, it is a splendid flower. Its bristly, hairy roughness renders it very distinct and valuable in a first prize stand. Has received a First-Class Certificate wherever shown. 1s. each.

ARCHIVISTE BLANCHARD (Incurved Jap.)—The florets are tubular, quite narrow at the base, widening gradually toward the extremity, each one being split and forked exactly in the same way as the points of the disc petals are in a Japanese Anemone variety, which gives the flower a peculiar appearance; colour bronze-red, each of the tooth parts of the florets tipped gold. 2s. 6d. each.

ADA SPAULDING (Japanese incurved)—Pink, shading to white. 2s. 6d.

ADVANCE (Japanese incurved)—Deep violet pink. 2s. 6d.

AIDA—Reddish bronze, suffused yellow. First-Class Certificate, National Chrysanthemum Society. 2s. 6d.

ALICE CARTER—Thread-like petals, Indian-red shaded gold; a novelty. 1s. 6d.

ANNA HARTZHORN—A beautiful pure white Japanese incurved, large, moderate depth, well-formed. First-Class Certificate. 5s.

BARONALD—Red and bronze. 2s. 6d.

BEAUTY OF CASTLEWOOD—Clear orange, inner surface deep red, a first-class variety. First-Class Certificate, National Chrysanthemum Society. 3s. 6d.

BEAUTY OF KINGSESSING—Pale lavender, centre florets recurved. 2s. 6d.

BELLE HICKEY—Pearly-white florets, incurved; very promising. 1s. 6d.

BRYNWOOD—Bright pink, shaded silvery-rose. 1s. 6d.

CARDINAL DESPREZ—Deep rose, silvery reverse. 1s.

CARROLL ELLIOTT—Red, tipped gold. 2s. 6d.

CLARENCE BRYANT—Bright golden-yellow; very free, one of the best October varieties. 2s. 6d.

COMMOTION—Tubular florets, pink shading off to white. 2s. 6d.

DANÆ—In the way of *Japonais*, deeper flower, broader petals, and better constitution. First-Class Certificate, Royal Horticultural Society. 2s. 6d. each.

EXCELLENT—Soft pink colour. 2s. 6d.

EYNSFORD WHITE (Cannell) (A seedling of our own raising).—As good and as popular as our *Avalanche* is, and there has hardly been a first or a second prize awarded but what this variety has been the best blooms in the stand; and to show the superiority of Eynsford White, it was awarded a First-Class Certificate of Merit by the Royal Horticultural Society, and a First-Class Certificate the next day by the National Chrysanthemum Society, shown side by side of *Avalanche*. It has a broader and more ivory-white petal, and is the best and most solid white ever sent out. 2s. 6d.

FLORA MACDONALD—Creamy white; florets incurved. 1s. 6d.

GASPARD ROZAIN—Silvery-white, heavily mottled or veined lilac-rose; shaded carmine reverse; tipped citron-yellow. 2s. 6d.

GEORGE ATKINSON—White, flat petals; large. 1s.

GEO. MCCLURE—Purple, shaded amaranth. 1s. 6d.

GOLDEN STAR—Rich clear yellow; habit fine, very free flowering. 2s. 6d.

GRANDIFLORA SUPERBA—Brick red. 1s.

HARVEST QUEEN—Early; ivory-white; reflexed. 1s.

J. G. BLAINE—Rich dark maroon, tipped gold. 2s. 6d.

KIOTO—Deep yellow florets; incurved. 1s. 6d.

L. CANNING—White; good form. 1s. 6d.

NEW INCURVED ENGLISH VARIETIES OF 1890.

BEAUTY OF HULL (sport from *Mr. Bann*).—It must be distinctly understood that there are two sports, this being very distinct from one called *Mr. Shoemith*. It has a much lighter and brighter ground colour, with a bronze stripe up each petal, really a fine distinct and telling addition; of course finely incurved flowers of a good shape, and one of the best front row flowers in cultivation. 1s. 6d. each.

JOHN LAMBERT—A sport from *Lord Alcester*; buff, shaded rose. 1s.

Mr. ROB. MUDIE, *syn.* **JOHN DOUGHTY**—A sport from the *Queen of England*, possessing all the good qualities of that variety; nicely incurved, lovely new colour salmon rose, and a flower sure to be highly appreciated. 1s. 6d.

MRS. S. COLEMAN—A sport from *Princess of Wales*; golden bronze, shaded rose, upper portion bright yellow; splendid show flower. Awarded six First-Class Certificates. 2s.

WILLIE—A light amber sport from *Captivation*. First-Class Certificate. 1s. 6d.

Mr. W. NINN, Castlebridge, Wexford, Ireland, *September 27th*, 1890.

I enclose you P.O., amount of your account. The Chrysanthemum plants you sent me are very strong and healthy, and I hope to have some good blooms. You must have got orders on my recommendation from some of our friends.

Mr. W. TURNER, Royal Naval Hospital, Gt. Yarmouth, *February 7th*, 1890.

I have sent order for a few Chrysanthemums. I did very well with the plants I got from you last year. I was awarded five firsts in cut bloom at the above show.

LARGE ANEMONE-FLOWERED CHRYSANTHEMUM

H. Cannell & Sons' Floral Guide.

LARGE-FLOWERING ANEMONE, OR QUILLED ASTER-LIKE CHRYSANTHEMUMS.

A stand of these, when well grown, has a most unique and beautiful appearance, and if once seen they would be grown by hundreds; and the same with Pomponé Anemone.

The selection here made includes the best of this somewhat limited but very beautiful class. They should be exhibited in single flowers, like the Incurved.

245. **AGNES HAMILTON**—Silvery rose-pink.

304. **GRAND ALVÉOLE**—Light blush; distinct.

ANEMONE OR QUILLED ASTER-LIKE FLOWERED POMPONS FOR STANDS OF CUT BLOOMS.

Amongst the many stands of flowers seen at Chrysanthemum exhibitions, none, in our opinion, surpass these for beauty of colour and chaste appearance. They should be exhibited with three sprigs or shoots, together with from 8 to 10 inches of stem and foliage. As their flower stems are very weak, and do not hold up their flowers well, they should be strengthened with wire.

H. Cannell & Sons' Floral Guide.

 I exhibited at Hesse and Hull Chrysanthemum blooms from your cuttings, and took four first and two second-class prizes in the amateur classes.

JAPANESE CHRYSANTHEMUMS.

SECRETS IN COMPETITION.

Although the Japanese do not require to be made as uniform as if they had been cast in one mould, like the incurved and recurved, yet they require similar arrangement, so that they each present a regular and pretty form, whatever their natural shape may be. Massiveness and great depth of flower is most appreciated; flat hollow centres and undecided colours should be avoided. No model can be set up in this section as the one required. Yet whatever style of twisting, curling, or recurring best suits the variety, so assist that growth of the flower to develop itself, and when done, it must be such as the eye will cause the tongue to say, "That is pretty; I like that variety." It generally follows, what pleases the public pleases the judges, and that is the secret of success.

EARLY-FLOWERING CHRYSANTHEMUMS.

EARLY flowering Chrysanthemums are making rapid improvement; we now give them more attention and grow them better. Our house, after the Carnations and Picotees were removed, and during August and September, was really a fine sight. It cannot be said we have nothing but Dahlias in the autumn, for these can be had in abundance; yes, for many continue throwing up flowers after the first lot are cut—so very different to the ordinary November kinds, and for bedding many of the varieties make a grand feature. Mr. Graham, the Superintendent of Hampton Court Gardens, writes us:—"Madame C. Desgrange has again made the most attractive bed in the Gardens this season, and these are fast becoming a most important section of this family, but like all Chrysanthemums they require to be well grown, otherwise they will end in disappointment."

COUNTRY GROWN PLANTS AND CUTTINGS.

The difference between our country grown plants and cuttings, and those grown and sold in or near London or other towns, is so manifest, that no comparison can be drawn. True, they like soot at their roots, but not to be covered with it, as they must be when grown in such a situation, and for the want of light are poor and drawn up; whereas, ours are clean, strout, and healthy, and will root in half the time.

OCTOBER FLOWERING VARIETIES.

779. **L'AMI COUDERCHET**—Not only in consequence of this variety being a fuller size of the early August blooming varieties than most of the older kinds, but it has the peculiarity of—after cutting off all its flowers—its side shoots breaking out, and produces another lot of nice, useful flowers for cutting. Colour lovely yellow; is really a capital, useful kind. This planted out will prove one of the best plants for cut flowers in the garden, and a first-class herbaceous plant. 1s. each.

780. **A. VILLATTE DES PRUGNES** (Jap.)—Beautiful silvery pink; useful. First-Class Certificate.

781. **ALEX. DUFOUR**—Brilliant violet, bordering on Bishop's violet, reflex dark violet; dwarf habit; very free and early. Received First-Class Certificate. 1s.

782. **BLANC PRECOCÉ** (Jap.)—White, shading to pink. 1s.

783. **AIGLE D'OR**, *syn.* **HEBDEN BRIDGE** and **BERROL**—Bright yellow; large.

BLANCHE COLOMB—Creamy white pompon; distinct.

784. **BOLIDE**—A beautiful yellow Pompon; one of the best.

785. **BOUQUET ESTIVAL**—Deep rosy shade, reverse of petals silver.

786. **DRIN DRIN**—Yellow; very free.

787. **FAIRY QUEEN**—White, resembling *Source d'Or*; very elegant. 2s.

788. **FLEUR D'ÉTÉ**—Amaranth, shaded and tipped white.

789. **FÉLICITÉ**—Changing from orange to yellow; a fine variety, extremely free and showy.

790. **GENERAL CANROBERT**—Yellow; very free bloomer.

791. **ISADORE FERAL**—Rose-lilac, chamois centre.

792. **JAS. SALTER** (Jap.)—Clear lilac or rosy mauve, shaded towards centre, incurved.

793. **LA VIERGE**—Dwarfest and best pure white in cultivation. Received Certificate.

OCTOBER-FLOWERING CHRYSANTHEMUMS

SINGLE CHRYSANTHEMUMS.

ADMIRAL SIR T. SYMONDS.

Mr. MYRON A. HUNT, Florist and Seedsman, Terre Haute, Ind.
The Plants you sent us some weeks ago arrived in grand order. Of the 100 but one is dead

H. Cannell & Sons' Floral Guide.

If we were to print half the extracts from the various horticultural papers, and the letters from those to whom we have sent flowers, including some of the highest titled patrons in the land, they would fill many pages, therefore we are convinced the following will suffice to cause these most highly useful and easily grown flowers to be cultivated in every garden. They are little or no trouble to grow; produce more blooms, last longer in good condition, either cut or enueut, than the doubles, in persistency of petal the single Dahlias bear no comparison, neither do they for real beauty and use. Further, they have a nice perfume, and for all kinds of decoration will not only add a new charm, but fill our tables with brightness and beauty up to and past Christmas.

a ADMIRAL SIR T. SYMONDS (Cannell)—Large deep yellow, as per engraving. Two First-Class Certificates. 1s.

804. **AMERICA**—Opening blush, shading off to white; large and fine. 1s. each.

805. **aAURORA** (Cullingford)—Maroon-chestnut; large and showy.

806. **BUTTERCUP** (Cannell) (Incurved)—A lovely yellow, much resembles its name; for decoration very valuable. 1s.

808. **aCANARIENSE** (Improved, Cannell)—Clear yellow; large, distinct.

809. **CASINO**—Rich rose, striped white; large.

810. **CRIMSON AND GOLD**—Rich crimson. 1s.

811. **CRUSHED STRAWBERRY** (Cannell)—A useful variety for general decoration; effective. 1s.

aD. WINDSOR (Cannell)—Very large fine flowers, chestnut-red. First-Class Certificate, N.C.S.

EFFIE (Delaux)—Deep Crimson; large and fine. First-Class Certificate. 1s. 6d. each.

FATMA (Cannell)—A very high coloured purple rose, and the deepest coloured variety of the day. These three are very fine and grand for all purposes. 1s.

JANE (Snowflake, Cannell)—A long way the best and most valuable white Single Chrysanthemum yet raised. Awarded two First-Class Certificates. 9d.

JENNY LIND (Cannell)—A Japanese, yellow tinted orange; for cut flowers a gem. 1s.

aJOHN TYARS (Cannell)—Rich magenta, pure white at base of florets, forming into a distinct white ring. 9d.

aKING OF THE YELLOWS (Cannell)—Medium size, very deep yellow; late flowering. 1s.

Marmullane, Passage West, March 12th, 1890.

Mrs. H. BROWNE is very much obliged to Messrs. Cannell for the good Chrysanthemum cuttings, which arrived safely to-day in splendid condition.

E. McHUGH, Esq., 62, Northumberland Road, Dublin, January 31st.

The Chrysanthemum Cuttings are duly to hand. I feel bound to add that the selection of varieties was excellent, and to thank you therefore.

CHRYSANTHEMUM (MARGUERITES) PARIS DAISIES.

(Golden and Silver Stars.)

This class is really one of the most valuable for cut flowers; with only ordinary care they can be had in flower all the year. During the winter they are indispensable, and if afterwards planted out they make a splendid bed; if they have a fault at all, it is because they are too easily propagated. They were much admired by all visitors at the Paris Exhibition, and are extensively grown in the French parks as bedding plants. The fact of their never ceasing flowering makes them household flowers everywhere.

835. **ALICE CROUSSE**—Dwarf and very free; one of the best.

836. **HALLERI MAXIMA**—White; very free, one of the finest.

CLOTH OF GOLD (Coronarium type)

840. **ÉTOILE D'OR**—Yellow; blooms nine months in a year. 1s.

841. **MADAME FARFÆILLON**.

842. **MINIATUM**—White.

843. **PINNATIFIDA**—Beautiful foliage.

844. **SPECIOSUM** (Leucanthemum)—
Supposed to be the original variety.

845. **ULIGINOSUM** (Pyrethrum)—White .
large yellow centre, blooms in September; a
valuable hardy species, splendid for cut flowers.

846. **CHRYSANTHEMUM MAXIMUM**—
Pure white, yellow centre; fine for cutting.

AURORA.

THE FIRST CHRYSANTHEMUM SHOW IN ENGLAND was held at Norwich in the year 1830, and the names of the varieties exhibited were:—*Tasselled Yellow, Clustered Pink, Yellow Cluster, Silver White, Yellow Flame, Early Blush, Changeable Pale Buff, Large Lilac, and Golden Yellow.* How happy nurserymen and gardeners must have been in these days, with so few and such easy names!

SULPHATE OF AMMONIA.

This will be found useful in the cultivation of the Chrysanthemum, more especially to swell out the buds, and give vigour to the whole plant.
